# What makes us different from other solutions

## Value proposition

"True" active management, fully focused on achieving a superior performance

Concentrated portfolio of hand-picked European small and micro caps

Well-established team of passionate value investors

Sustainable strategy through early limitation of the fund volume

Long term thinking, both when investing and with our company

LONG-TERM EXPECTED **RETURN OF >10% PER YEAR** WITH ADDITIONAL RETURN POTENTIAL THROUGH REVALUATIONS

# Executive Summary

## PASSIONATE TEAM

Daniel Gehlen and Marc-Lennart Bräutigam have been a very well-interacting team for more than five years

After years together in investment banking at top international firms they founded Gehlen Bräutigam Capital GmbH in 2018

As passionate value investors they advise the European equities fund (UCITS) Gehlen Braeutigam Value HI and are of course also substantially invested

## OUR PHILOSOPHY

Put simply, we buy companies for prices significantly below their intrinsic value. We sell when the fair value is reached

Focus on sustainability of results and avoidance of unnecessary risks when analyzing the intrinsic value of companies. Future growth offers upside

The best ideas are held in a concentrated portfolio and are continuously reviewed and monitored

## FOCUS ON SMALL & MICRO CAPS

With over 5,000 listed companies in Europe, small & micro caps offer many times more opportunities than standard stocks

The lower coverage of smaller companies by sell- and buy-side analysts leads to more frequent mispricings

Our task is to identify undervalued and well-managed companies through our own and very extensive research process. In doing so we benefit from above-average returns

## CO-INVESTORS

We think long-term, both in investing and with our own company. Therefore we are looking for like-minded people who can invest for the long term alongside us

Our company has no external shareholders, so we are independent and do not have to focus on short-term profitability or maximizing assets under management. By strictly limiting the fund volume, we offer a sustainable solution

OUR GOAL IS TO DELIVER EXCELLENT INVESTMENT RESULTS WITHOUT TAKING UNNECESSARY RISKS AS WELL AS TO MANAGE OUR COMPANY WITH THE HIGHEST DEGREE OF OPENNESS AND INTEGRITY.

# Risk / return profile

The Gehlen Braeutigam Value HI is classified in category 6 because its unit price has fluctuated strongly and therefore both the risk of loss and the chances of profit can be high.

This indicator is based on historical data; it is therefore not possible to predict future developments. The fund's classification may change in the future and does not constitute a guarantee. Even a fund that is classified in category 1 does not constitute a completely risk-free investment.

## THE FOLLOWING ADDITIONAL RISKS MAY BE SIGNIFICANT TO THE FUND:

### LIQUIDITY RISKS

The Fund invests a substantial part of its assets in financial instruments that are not traded on the official market of a stock exchange or similar market or that are difficult to sell for other reasons and for which it may therefore not be possible to find a buyer in the short term. This may increase the risk of suspension of unit redemption of the fund.

### CUSTODY RISKS

Custody of assets, particularly abroad, may involve a risk of loss resulting from insolvency, breach of duty of care or improper conduct by the custodian or a sub-custodian.

### DEFAULT RISKS

The Fund enters into transactions with various contractual partners. There is a risk that contractual partners may no longer be able to meet their payment or delivery obligations.

### OPERATIONAL RISKS

Human or technical failure, inside or outside the company, but also other events (such as natural disasters or legal risks) can cause losses to the fund.
